

New sweeps slots in social casinos

I haven't been following the latest developments in social casinos lately, so I understand that I've missed a lot of interesting things. To be honest, I don't have much time to research everything in detail, so I would like to ask for your help. Do you have a list of new sweeps slots in social casinos? Which ones did you like the most?

Oh yes, especially during the holidays, I want to spend time with my family instead of endless analysis. Especially since there are many users here, I can definitely help you with that. For example, American Luck social sweeps casino has a whole tab with new slots for every taste. Do you prefer classics or something themed? I like to alternate games to make it more fun to accumulate coins, and I win more often that way. Right now, for example, I chose 3 Hot Chillies after Big Bass Bonanza, which is a really big contrast.
