

## Has anyone used the Luck Party Casino VIP program?

I stumbled upon Luck Party through a YouTube video where someone was talking about the program. I was already playing there with free coins, so the video piqued my interest. Now, I'm wondering if it makes sense to actively play to level up. Has anyone actually used the program? It looks pretty cool, but I don't know if the bonuses are valuable or just for show.

I'm just starting out, so I don't know how quickly you can level up or if you can actually earn benefits like rewards or gifts. I don't want to waste my time if the benefits are minimal. Has anyone reached a decent level yet? If so, could you explain how it works?

I found out about this through a friend who has been using it for a while and is currently at the Prestige level. He says he can already feel the difference. They actually offer a 3% weekly coin return, which is significant if you play often. He's also received decent bonuses for his birthday and account anniversary. I checked the loyalty program details, and overall, the system is simple: You play, earn points, and level up. When you reach Prestige level, Luckparty gives you 20 free spins, which is nice too. Do you visit often, or are you just testing it out for now? What slots do you usually play?
