Questions about Mustang slot on Albumza site

Hey there! The other day, I was looking for something exciting to play while having my evening tea and remembered the good old Westerns, so I logged into the Albumza social casino and opened the Mustang Hold and Win slot by Booming. The music is really catchy, and the game features 5 reels and 25 paylines with wild symbols that appear in stacks on the middle reels. Has anyone tried it yet?

And I’m curious—how often do you manage to land 3 scatters in the base game to trigger 8 free spins with the chance to retrigger them? And is it actually possible to fill all 15 cells on the screen to win the 1,000x Grand jackpot, or does it usually end with small payouts and just a few Mini and Major coins when you use the bonus buy feature?

I’m also a fan of this cowboy aesthetic—it’s a great way to take my mind off the daily grind. As for the slot, the stacked wilds really come in handy in the main game, since they often cover several paylines in a row. As for the coin respins, the attempt counter resets every time a new symbol lands, so collecting all 15 symbols is entirely possible with a lucky streak. If you’re interested in learning more about the payout structure and the bonus game features, check out the review of play Mustang Hold And Win on Albumza—it includes a helpful breakdown of all the rules. Buying the bonus gives you quick access to the payout, but even the standard 8 free spins from scatters offer excellent chances for a good result. By the way, do you prefer chasing jackpots, or do you just spin for the fun of it?
